Career Objectives

Motivated Software Developer with strong skills in Java, MySQL, Linux, and shell scripting. Experienced in building and deploying applications using Docker, CI/CD pipelines, and AWS services. Skilled in manual and automation testing with Selenium, ensuring quality and reliability. Passionate about designing scalable systems, automating workflows, and delivering high-performance, thoroughly tested software solutions. Quick learner with strong multitasking, adaptability, and team collaboration skills.

Education

2021 - 2025	B.E(ISE), K.N.S InstituteOfTechnology	9.1(CGPA)
2019 - 2021	PUC(PCMC), Goodwill PUCollege	99%
2018 - 2019	High School (Class10 th), St.Flowers High School	94%

Technical Skills

Operating System & Scripting

- Linux - Server setup, Deployment, Package management
- Shell Scripting - Automation, Task scheduling

Core Java

- Understanding of Access modifiers, Static And Non Static Members, Constructors.
- Proficient in OOP concepts (Inheritance, Polymorphism, Abstraction, Encapsulation)

Cloud Computing

- IBM Cloud - Gained understanding of cloud fundamentals, service models (IaaS, PaaS, SaaS).
- AWS - Trained in EC2, S3, IAM and fundamentals of cloud computing.
- DevOps - Learned version control (Git), basics of CI/CD pipelines, for software deployment.

SQL

- Hands-on experience with DDL, DML, and DQL operations.
- Designed and managed relational schemas with primary keys, foreign keys, and constraints.
- Skilled in using Self JOINS to combine and analyze related data within the same table.

Software Testing (Manual & Automation)

- Strong understanding of SDLC & STLC, hands-on experience in requirement analysis, test case review.
- Skilled in writing and executing test cases and performed functional, regression, smoke, and system testing.
- Automated test scenarios such as user login, form validation, search functionality, and navigation checks.

Work Experience

Teamware Solution - Intern (July 2025 - September 2025): Worked on projects involving Linux and automation using shell scripting. Designed MySQL databases for CRUD processes. Deployed applications in Docker containers and provisioned AWS EC2 instances using AWS CLI for cloud-based deployments.

Rooman Technologies (Incube LMS) – Beta Tester (Jan 2025 - Mar 2025) : Tested Incube LMS, reported bugs, and evaluated learning module functionality.

KodNest – Web Development Intern (Sep 2024 - Nov 2024) : Built a Static website using HTML, CSS, and JavaScript as part of a team project focused on front-end development.

ProInterns – Beta Tester (Apr 2022 - Sep 2022) : Worked as a Beta Tester on a client project, validating website features before release. Reported bugs, ensured cross-browser functionality, and provided UI/UX feedback to enhance usability and overall user experience.

Projects

AutoDeploy - CI/CD Deployment of Resume Website on AWS EC2 : Built and deployed a personal resume website on AWS EC2 using Apache2 and implemented a GitHub Actions CI/CD pipeline (custom YAML workflow) to automate file transfer, Apache configuration, and server restart via SSH. Configured the workflow to trigger on every push to the main branch, enabling seamless continuous deployment with zero manual intervention and ensuring updated content is served instantly.

Dockerized Login Application: Developed a responsive login application using **HTML, CSS, and JavaScript** with real-time input validation. Styled the UI for a clean and modern design. Containerized the application using **Docker** and deployed it, enabling easy local access and testing. Validated functionality for incomplete inputs and successful logins, ensuring reliability and smooth user experience.

Airlines Ticket Booking Platform (DBMS) : Developed a basic web-based airline ticket booking system using **DBMS**. The system supports user login/logout, admin login/logout, and ticket booking functionalities which represents **CRUD operations(Create, Read, Update, Delete)**. Admin features include managing flight details, booking records, and user information.

Job Search Automation using Selenium (JAVA) : Developed an automated web application using Selenium WebDriver in Java to streamline the login process and job search functionalities on Naukri.com. The automation script improves efficiency by eliminating the need for manual login and job searching, allowing users to easily search for jobs based on keywords and locations.

Portfolio Website (HTML , CSS) : Designed and developed a personal portfolio website showcasing projects, skills, and professional details using **HTML** and **CSS**, with a clean and organized layout.

Certifications

Cloud Application Developer – NSDC Roorkee : Trained in MySQL, Agile methodology, AWS (EC2, S3, IAM), Cloud fundamentals, DevOps basics (Git, CI/CD).

Introduction to Cloud - IBM : Gained understanding of Cloud Computing fundamentals, Service models (IaaS, PaaS, SaaS), and Deployment models (Public, Private, Hybrid). Explored IBM Cloud services including Compute, storage, and networking.

Software Testing – QSpiders : Trained in Java, SQL, Manual Testing, STLC, SDLC, Test Case Design, and Defect Lifecycle and automation using Selenium Web Driver.

Achievements and Volunteering Experience

- Secured **Second Prize** in a Paper Presentation competition at Cognitech-23.
- Won **First Prize** in a Debugging Competition at Tech Takshak 2024.
- Served as **Class Representative** for three consecutive years and **Hackathon Coordinator** at Tech Takshak 2024 (KNSIT), managing logistics and participant coordination.
- Volunteered in **Cancer Awareness Campaign** by Suriya Foundation.
