Career Objectives

Motivated Full Stack Developer and Software Tester skilled in front-end and back-end development using Java, Spring Boot, HTML, CSS, JavaScript, and MySQL. Experienced in manual and automation testing with Selenium WebDriver. Quick learner with strong multitasking, adaptability, and team collaboration skills. Passionate about building reliable applications and ensuring quality through effective testing.

Education

2021 - 2025	B.E(ISE), K.N.S Institute Of Technology	8.9(CGPA)
2019 - 2021	PUC(PCMC), Goodwill PUCollege	99%
2018 - 2019	High School (Class 10 th), St. Flowers High School	94%

Technical Skills

Core Java

- Strong in OOPs concepts – Encapsulation, Inheritance, and Polymorphism.
- Hands on with Static And Non Static Members, Constructors.

Manual Testing

- Strong understanding of SDLC and STLC.
- Experience in writing and executing test cases, test scenarios, and test plans.
- Performed functional, regression, smoke, and system testing.
- Hands-on experience in test case review, requirement analysis, and impact analysis.

Automation Testing

- Hands-on experience in automating web applications using Selenium WebDriver with Java.
- Knowledge of locators (ID, Name, ClassName, XPath, CSS Selector, etc.) to interact with web elements.
- Automated test scenarios such as user login, form validation, search functionality, and navigation checks.

SQL

- Hands-on experience with DDL, DML, and DQL operations.
- Skilled in using Self JOINS to combine data from multiple tables.
- Familiar with GROUP BY, HAVING, ORDER BY for analytical tasks.
- Designed and managed relational schemas with primary keys, foreign keys, and constraints.

Web Designing

- Good at building structured web pages using HTML elements including headings, lists, forms, tables, images, and media tags.
- Able to apply inline, internal, and external CSS stylesheets for design consistency.

Advance Java

- Hands on with JDBC to connect Java applications with databases and perform CRUD operations.
- Familiar with Spring Framework fundamentals like Dependency Injection and Inversion of Control.
- Used Hibernate ORM to map Java classes to database tables using annotations. And Used MySQL with JDBC and Hibernate for database interaction.

Work Experience

ProInterns – Beta Tester (Apr 2022 - Sep 2022)

Contributed to Development of website using HTML, CSS, JavaScript. Tested platform features, identified bugs, and provided UI/UX feedback pre-release.

KodNest – Web Development Intern (Sep 2024 - Nov 2024)

Built a responsive website using HTML, CSS, and JavaScript as part of a team project. Focused on front-end development and interactive UI elements.

Rooman Technologies(Incube LMS) – Beta Tester (Jan 2025 - Mar 2025)

Tested Incube LMS, reported bugs, and evaluated learning module functionality.

Projects

Job Search Automation using Selenium (JAVA) : Developed an automated web application using **Selenium WebDriver** in **Java** to streamline the login process and job search functionalities on Naukri.com. The automation script improves efficiency by eliminating the need for manual login and job searching, allowing users to easily search for jobs based on **keywords** and locations.

Airlines Ticket Booking Platform (DBMS) : Developed a basic web-based airline ticket booking system using **Database concepts**. The system supports user login/logout, admin login/logout, and ticket booking functionalities which represents **CRUD operations(Create, Read, Update, Delete)**. Admin features include managing flight details, booking records, and user information.

Blockchain Based Smart Agriculture Management System : Developed a **decentralized** agriculture management system using **Ethereum blockchain** and **Solidity Smart contracts** to enable **secure, transparent** and **automatic transactions** for farmers and buyers. The front end was developed using **HTML, CSS, and JavaScript**. The system ensures data immutability, automates processes like crop registration and payments, and promotes trust through **Blockchain** based record keeping.

Certifications

Java Full Stack Development – JSpiders : Trained in Core Java, JDBC, Servlets, Spring Boot, HTML, CSS, JavaScript, and MySQL integration for full-stack web development.

Software Testing – QSpiders : Trained in Manual Testing, STLC, SDLC, Test Case Design, and Defect Lifecycle and Hands-on experience in Automation Testing using Selenium WebDriver and Java.

Python Programming – Indian Tech Keys : Learned core Python concepts including variables, data types, control flow, functions, and file handling.

Soft Skills Development – Wadhwani Foundation : Completed training in professional communication, teamwork, problem-solving, and interview preparation.

Web Development – ProInterns: Learned HTML, CSS, JavaScript, and responsive design through hands-on projects and real-world simulations.

Achievements and Volunteering Experience

- Won First Prize in a Debugging Competition at an inter-college tech fest, Tech Takshak 2024
- Volunteered in a Cancer Awareness Campaign by Suriya Foundation, supporting community outreach and education.
- Hackathon Coordinator at an inter-college fest (KNSIT), managing logistics and participant coordination.
- Served as Class Representative for three consecutive years.
